

When drinking a world-class stout like Guinness, there are some things you should ignore, and others that are imperative to know.

Things to ignore:

- 1.** Managing director Hugh Beaver launched a compendium of little-known facts called the Guinness Book of Records.
- 2.** The color of a Guinness, when held up to the light is not black, but a deep dark red
- 3.** Unlike other taps, Guinness is dispensed through a five-hole disk restrictor plate. (This is only relative to making your beer delicious, again, you should ignore)
- 4.** A 20-ounce pint of Guinness is a mere 210 calories and contains loads of iron and antioxidants.

Imperative to know:
